ACKNOWLEDGEMEN

First of all, we are thankful to Mr. Nguyen Ngo Phuoc for supporting us on the project and the cooperation of each team's member. The project couldn't be finished without their hard work. The project help us get more experience in team working and problem solving. It gives us a lot of confidence to face an interview as us have worked on a project.

Finally, we express our gratitude toward our families and colleagues for their kind cooperation and encouragement which help us in completion of this project.

PROBLEM STATEMENT

CENTRAL zoo is one of the biggest zoo in the town. The land area of the zoo is 33 acres. CENTRAL zoo was established in the year 1980 with 10 acre land but lately it was modified and land area was also added in the year 2000. Proper residing space for all the type of animals has been made and maintains human security at high rate. Proper supply of food for all the animals is maintained and checked at regular intervals. You need to develop a website for the CENTRAL zoo which will provide the information about all the animals (like species, animal classification) which are kept and along with their image.

The website is to be developed for the Windows Platform using HTML5, JavaScript and Geolocation. The site should work well in all leading browsers including Chrome, IE, Firefox etc.

REQUIREMENT SPECIFICATION

The Web site is to be created based on the following requirements.

1. The Home Page should be created making use of Sections with a suitable logo.

2. The look and feel of the project must be made user friendly and uniformity in the color combination must be maintained.

3. About us, Contact Us (address and map) must be added, it's location displayed using GeoLocation API on the maps.

4. Animal's information can be added in the categorized like birds, animals, water animals, and so on.

5. Safari option is there for which dummy booking option can be added.

6. Gallery of animals and birds must be added in the website.

7. Timings of the zoo must be added.

8. Navigation of the project must be made smooth.

9. Events organized (Informative for audience and for the welfare of the animals) must be noted.

10. Feedback and query can be added in the website

HARDWARE/SOFTWARE REQUIREMENTS

❖ **For webmaster**

Hardware

• Intel Pentium 4 processor or higher

• 1 Gigabytes of RAM or higher

Software

• Windows 7 OS or higher

• Sublime Text 3, Visual Studio Code

• Bootstrap 3, jQuery, AngularJS, AOS, SweetAleart 2

• HTML5 and Javascript supporting web browsers such as IE, Chrome, Firefox, Opera…

❖ **For web users**

Hardware

• Intel Pentium 4 processor or higher

• 512 Megabytes of RAM or higher

Software

• Windows XP OS or higher

• HTML5 and Javascript supporting web browsers such as IE, Chrome, Firefox, Opera… (Website best running on Chrome browser)

SCOPE OF THE WORK (IN BRIEF)

After a long and detailed discussion, our group has decided to create a website contain the following webpages:

1. Homepage: Display information about events, an introduction about Central Zoo. Provides the widgets such as opening times, tickets, directions, zoo map and feedback.

2. Animals: Display all animals in Central Zoo.

3. Tickets: A form will be displayed, users can enter information to buy tickets online.

4. Directions: Directions to Central Zoo with Google Maps.

5. Zoo Map: Display detailed maps, roads, areas, entrances, exit ...

6. Development Team: Display our team members including, avatar, full name, contact information.

Zoo Central
ABOUT OUR PARK
Manhattan's Central Park Zoo is one of the oldest in the country, first opening on its current site in 1861. In the 1980s, the Wildlife Conservation Society assumed management of the park under a contract with the City of New York and completed a dramatic five year transformation. Since reopening in 1988, our mission has been to engage future generations of conservationists and create wildlife champions.

ANIMALS AT THE ZOO

In 1975, the Central Florida Zoo settled into its new location along Lake Monroe. Today, our Zoo is home to more than 350 animals representing over 100 species, from tiny, yet mighty, scorpions, to graceful giraffes and even the endangered Indian rhino. Come meet some of our planet's rarest animals and get to know the species in your own backyard a bit better, including the Florida black bear and the American alligator.

Amphibia
Poison Dart Frogs
Aposematic Amphibian
Most animals hide with camouflage, but the poison dart frog does the opposite! Their bright colors are easily seen by predators, and serve to warn of the poisonous skin of the frog. This type of warning is called aposematic coloration.
ABOUT THE SPECIES
The "dart" in poison dart frog comes from South American natives coating their weapons in the secretions of the frogs.
Poison dart frogs come in a variety of colors, including red, yellow, green, and blue. They gain their toxicity because of what they eat! They eat a variety of ants, termites, and other insect species. These insects eat plants that have toxins, and the toxins are transferred from plant, to insect, to frog. Many species of frogs are nocturnal, in order to hide better. The poison dart frog is the opposite! They are active in the day, when they can be seen the most. Their bright colors warn predators to not eat them.
The poison dart frogs at the Central Florida Zoo are in several different habitats in the Herpetarium. No worries though! The snakes don't bother the frogs and the frogs don't bother them.
Words From the Experts
Poison dart frogs are not poisonous in human care, because their toxicity is from what they eat in their natural habitat.
Andrea
has been developed based on the poison of the phantasmal poison frog, and secretions are also being used in the development of muscle relaxants and heart stimulants.
FACTS
Origin
South America
Diet
Ants, termites, centipedes, beetles
Reproduction
Up to 30 eggs per clutch
Habitat
Tropical rainforests
Predators
Larger animals may eat them, but soon learn better
Status
Threatened with habitat loss
Size
2 inches long | .14 ounces
Natural Defenses
Poisonous
Life Expectancy
Up to 15 years

JAVASCRIPT DESCRIPTION

This chapter will provide information about JavaScript function integrated in the website

1. Change Navigation

a. Description

Change the navigation bar when user scroll down or scroll to the top of the page.

b. Screenshot

```
$(document).ready(function () {
    loadTopMenu();
    $(window).scroll(function () {
        if ($(this).scrollTop() < ($("#header").height() - 300)) {
            $("#nav-top").removeClass('navbar-scroll');
            $("#logo").removeClass('logo-scroll');
        } else {
            $("#nav-top").addClass('navbar-scroll');
            $("#logo").addClass('logo-scroll');
        }
    });
    $("#buttonToggler").click(function () {
        $("nav.navbar").toggleClass("nav-top1");
        $("nav.navbar").toggleClass("change");
    });
})

function loadTopMenu() {
    $('#nav-top').animate({
        top: -200
    }, 0, function () {
        $('#nav-top').animate({
            top: 0
        }, 800);
    });
}
```

2. Form Validate

a. Description

Validate when user enters information into the feedback form.

b. Screenshot

```
(function ($) {
    "use strict";
    /*==================================================================
    [ Validate ]*/
    var input = $('.validate-input .input100');

    $('.validate-form').on('submit', function () {
        var check = true;

        for (var i = 0; i < input.length; i++) {
            if (validate(input[i]) == false) {
                showValidate(input[i]);
                check = false;
            }
        }
        return check;
    });

    $('.validate-form .input100').each(function () {
        $(this).focus(function () {
            hideValidate(this);
        });
    });

    function validate(input) {
        if ($(input).attr('type') == 'email' || $(input).attr('name') == 'email') {
            if ($(input).val().trim().match(/^([a-zA-Z0-9_\-\.]+)@((\[[0-9]{1,3}\.[0-9]{1,3}\.[0-9]{1,3}\.)|(([a-zA-Z0-9\-]+\.)+))([a-zA-Z]{1,5}|[0-9]{1,3})(\]?)$/) == null) {
                return false;
            }
        } else {
            if ($(input).val().trim() == '') {
                return false;
            }
        }
    }
```
